

OUR HYBRID ERA BEGINS

TOYOTA COROLLA ALTIS

Disclaimer: Toyota Motor Philippines Corporation reserves the right to change the vehicle specifications without prior notice. Vehicle featured is Toyota Corolla Altis Hybrid.

THE ERA OF FUNCTIONAL DESIGN

Elegance and performance come together to usher in an era of urban flair via refined style, technological design, and elevated class in the Toyota Corolla Altis Hybrid.

DISTINCTIVE DESIGN

Enjoy a sleek and stylish exterior surrounded by a unique air of class whenever you grab the wheel and hit the road.

SMART ENTRY
(HEV AND V ONLY)

AUTO-FOLDING SIDE MIRROR
(HEV AND V ONLY)

LED REAR COMBINATION LAMPS

DAYTIME RUNNING LIGHTS WITH LINE GUIDE
(HEV AND V ONLY)

17" ALLOY WHEELS WITH MACHINED FINISH
(HEV AND V ONLY)

IMPRESSIVE TECHNOLOGY

Experience unparalleled comfort and maneuverability with immersive Toyota technology.

AUTO-DIMMING MIRROR
(HEV AND V ONLY)

7" MULTI-INFORMATION DISPLAY
(HEV AND V ONLY)

PUSH START SYSTEM
(HEV AND V ONLY)

REAR COOLER
(HEV, V, AND G ONLY)

ELECTRONIC PARKING BRAKE WITH BRAKE HOLD
(HEV AND V ONLY)

8" DISPLAY AUDIO WITH APPLE CARPLAY AND ANDROID AUTO
(HEV AND V ONLY)

TNGA

Toyota New Global Architecture

The Toyota New Global Architecture or TNGA is one of our latest technologies which stands by our commitment of making ever-better cars. The Corolla Altis marks Toyota's next generation of platform in the pursuit of innovation to help achieve optimum drivability for customers in terms of agility, visibility, and stability.

VISIBILITY

A combination of key redesign points was made to hugely improve your visibility of the road and your surroundings, while greatly enhancing the overall safety of the passengers and other road users.

AGILITY

Having a lower center of gravity contributes to better on-road grip. With an addition of streamlined features, the Altis rewards you with agility that's ahead of its class.

STABILITY

One inevitably deals with momentum when taking on tight curves especially when driving at high speeds. But with the Altis' agility comes stability. The Altis is equipped with features to keep the vehicle's balance, resulting in a more comfortable, predictably stable ride.

BETTER VISIBILITY

For greater sight of the road, certain parts of the vehicle were modified — thinner front pillars and instrument panel, taller windows, and repositioned side mirrors to reduce blind spots and maximize the driver's visibility.

CIRCULAR BODY STRUCTURE

Overall cabin structure is redesigned with a strengthened ring structure for maximum stability. The flexing movements are also reduced to make the car more fun to drive.

DOUBLE WISHBONE SUSPENSION

Reduction of pitch and roll enables precise handling and agility, while optimization of wheel motion gives better steering responsiveness and lower center of gravity — resulting in a more comfortable ride.

Toyota
Safety
Sense

Toyota Safety Sense (TSS) is your indispensable virtual safety margin that intelligently aids your driving right at the most crucial moments. Utilizing the latest in active-safety technology, it keeps you and your passengers safe and sound, and away from harm.

PRE-COLLISION SYSTEM (PCS)

When your car senses an imminent collision from a sudden stop of the car you're following or from delayed braking on your part, the Pre-Collision System activates instantly to give you a visual and audible warning while arming your brakes in advance, to enable you to stop the car quickly and effectively.

DYNAMIC RADAR CRUISE CONTROL (DRCC)

When activated, sensors continuously monitor the distance of the vehicle ahead of you and automatically adjusts your cruising speed to maintain a consistently safe distance between you and the vehicle in the front.

AUTOMATIC HIGH BEAM (AHB)

The Automatic High Beam feature senses oncoming vehicles and automatically toggles your headlights' high and low beams appropriately.

LANE TRACING ASSIST (LTA)

You may not always be aware when a distraction or the effects of fatigue can cause you to swerve off lane. Lane Tracing Assist and Dynamic Radar Cruise Control aids in keeping you on the right lane. When you're about to swerve off lane, LTA will gently but firmly nudge you back to safety.

LANE DEPARTURE ALERT (LDA)

With a highly-audible beep and an instantly-perceptible warning light, the Lane Departure Alert quickly activates when it senses that you're gradually veering away from your proper lane, preventing any potential mishaps.

7 AIRBAGS

A total of 7 SRS Airbags provide a reliable shield of protection that surrounds the cabin's interior, for the protection of the car's occupants.

CLEARANCE AND BACK SONAR

Some obstacles may not always be visible when you're backing up. The Clearance and Back Sonar provides you with ample audible warning to prevent unwanted dents and allows you to reverse park easily even into tight spaces. (HEV and V only)

VEHICLE STABILITY CONTROL

Drive your Toyota with unprecedented peace of mind in various road conditions with VSC that keeps you and your passengers safe even in the most challenging driving situations; helping you prevent side skids, and assists in stabilizing the vehicle while turning on a tight curve.

BACK MONITOR

The Back Monitor assists you with a wide-angle camera view of the space you're backing into as you shift to reverse. This makes backing up easy, convenient, and safe. (HEV and V only)

HYBRID

Toyota gives you the full benefit of advanced Hybrid Technology: seamlessly combining an efficient gasoline engine and a high-output electric motor that self-charges for maximum fuel mileage.

 No plug-in needed

IDLE/LOW SPEEDS
When sufficiently charged, the battery powers the vehicle to save fuel.

ACCELERATION
Both the engine and battery supply power for optimum performance.

REGENERATIVE BRAKING
The motor generator recovers the kinetic energy from braking which recharges the hybrid battery.

TRANSMISSION

The Continuous Variable Transmission (CVT) complements the 1.8L engine providing better performance in conjunction with the electronically-controlled throttle. This gives you higher levels of drivability in terms of improved responsiveness, smoothness and quietness of your ride, and better fuel efficiency.

1.8L ENGINE

A 1.8L inline-four engine with Atkinson cycle exclusively designed for the hybrid system which achieves excellent fuel efficiency with a lightweight and compact design.

EV MODE

EV Mode is a hybrid-exclusive driving mode that solely uses the vehicle's battery as its source of power. Utilizing this feature produces less emission and results to better fuel consumption.

Variant	1.8 V HYBRID CVT	1.6 V CVT	1.6 G CVT	1.6 E MT
OVERALL DIMENSIONS				
Length x Width x Height	4630 x 1780 x 1455		4630 x 1780 x 1435
